Education, Training & Employment Solutions

Data Analyst

A Data Analyst is a responsible for inspecting, cleansing, transforming and modelling data with the goal of discovering and using relevant information to inform conclusions and supporting decision-making for the benefit for both businesses and third party clients and customers.

Data Analysts work across a variety of sectors and projects, providing technical data solutions to a varying stakeholders, clients and customers. Through technical data analysis and investigation, they are then able to document and report results, providing professional and contextualised recommendations to improve business performance.

Programme Benefits and Outcomes

Your Data Analyst would be able to;

- Develop a range of technical proficiencies, including but not limited to – Identifying, collecting and migrating data, Interpreting data, Statistical analysis and other analytical techniques such as data mining, Producing performance dashboards, Tools and techniques for data visualisation, Presenting results to stakeholders and making recommendations.

- Understand how the skills fit your business requirements and implement these effectively

- Develop the character necessary to perform well under pressure and the customer service skills to effectively communicate with stakeholders and clients

Nationally and Industry Recognised Qualifications

Alongside the programme, your employees will gain a Professionally recognised qualification to support their development, supporting your organisation in developed a high-skilled workforce.

Continuation Courses for your Employees

TEAM LEADING AND MANAGEMENT

Once your employee has developed the skills, knowledge, behaviours and experience needed to thrive in their role, and how to perform in a highly pressurised environment, our tailored pathway courses can support your organisation to progress them into supervisory, managerial, and even leadership roles. We do this successfully through advancing the skills, knowledges and behaviours previously learned, and supporting your employee to understand how the combination of technical knowledge and leadership skills and capabilities can benefit themselves, the staff and the organisation as a whole.

Our Data Analyts have gone on to completing the following continuation courses;

| TEAM LEADING LEVEL 3 | TEAM LEADING LEVEL 5 | OPERATIONS MANAGER LEVEL 5 |

THESE HAVE LEAD TO EMPLOYEES PROGRESSING INTO THE FOLLOWING ROLES;

Data Manager, Data Scientist, Data Modeller, Data Architect, Data Engineer

Programme Support and Additional Services

Our programmes are developed to support your business needs in developing the talent, skills and knowledge needed to help your business grow and succeed. Our Data Analyst course also includes the following components;

24 months programme duration

supported through industry recognised qualification

Dedicated Account Manager

monthly meetings to satisfy all your questions, feedback and communication needs

Personalised coach, tutor and assessor
