DevOps Engineer

DevOps Engineers are responsible for the full software development life cycle. They are a key driving force for ensuring successful implementation and integration of the use of DevOps practices across an organisation or department. This includes; automating processes around development, testing and release of new features of products, as well as continuous monitoring, integration and improvement of products and services.

Working as part of a wider team, DevOps Engineers require the technical proficiencies and contextual understanding to ensure effective and streamlined communication across the project and between individuals and teams. They are primarily responsible for interpreting the design documentation and specifications that are defined and delivered by specialist members of the team, such as a business analyst or technical architect.
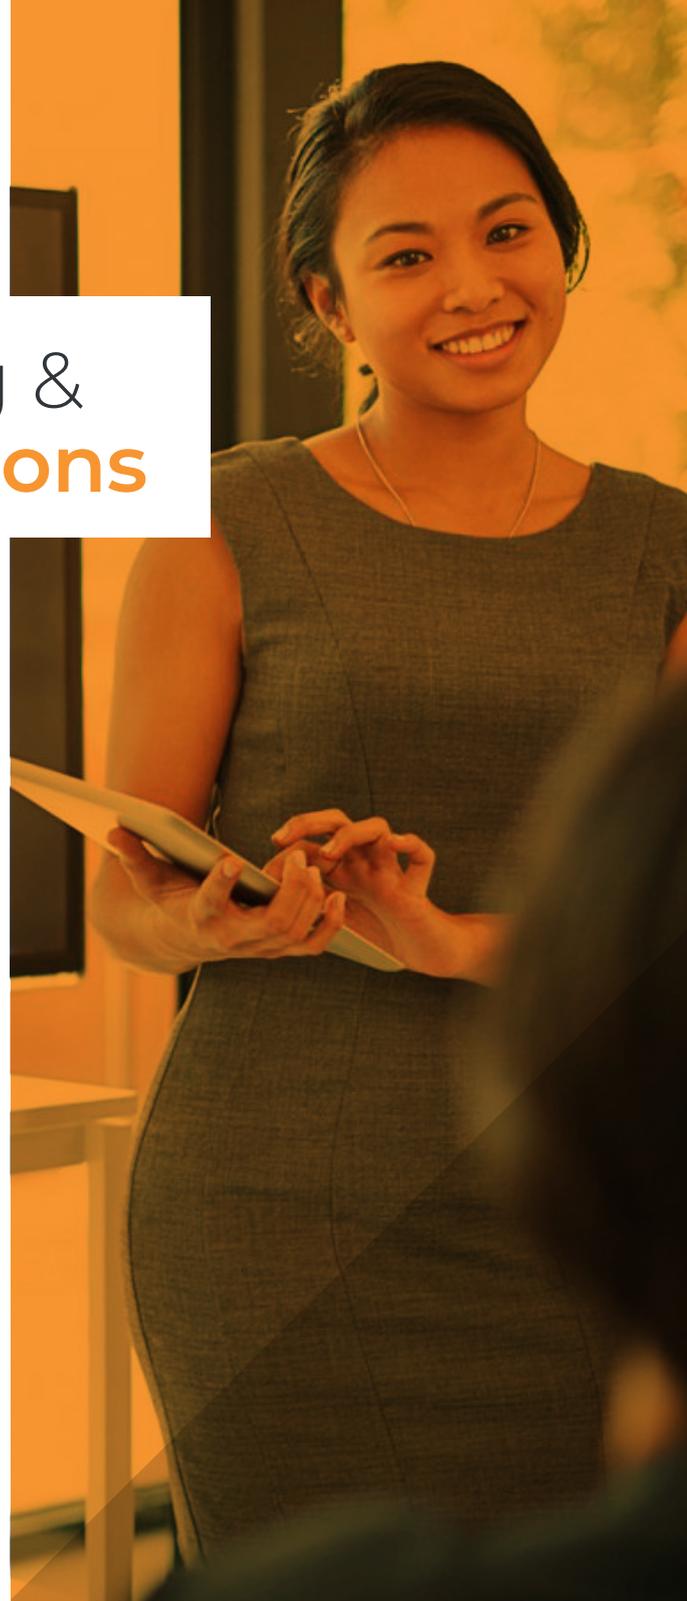

Programme Benefits and Outcomes

Your DevOps Engineer will be able to;

- Develop a range of technical proficiencies, including but not limited to – DevOps Culture and Methodologies, DevOps Infrastructure, Coding Fundamentals, Networking and Security, Cloud Computing, Linux and DevOps Tooling.

- Understand how the skills fit your business requirements and implement these effectively

- Develop the qualities needed to perform well under pressure and as part of a wider software development team and Digital/IT/ Technology organisation.

Nationally and Industry Recognised Qualifications

Alongside the programme, your employees will gain a Professionally recognised qualification to support their development, supporting your organisation in developed a high-skilled workforce.

Continuation Courses for your Employees

TEAM LEADING AND MANAGEMENT

Once your employee has developed the skills, knowledge, behaviours and experience needed to thrive in their role, our tailored pathway courses can support your organisation to progress them into supervisory, managerial, and even leadership roles. We do this successfully through advancing the skills, knowledges and behaviours previously learned, and supporting your employee to understand how the combination of technical knowledge and leadership skills and capabilities can benefit themselves, the staff and the organisation as a whole.

Our DevOps Engineers have gone on to completing the following continuation courses;

TEAM LEADING LEVEL 3	TEAM LEADING LEVEL 5	OPERATIONS MANAGER LEVEL 5

THESE HAVE LEAD TO EMPLOYEES PROGRESSING INTO THE FOLLOWING ROLES;

DevOps Engineer/Manager, Infrastructure Engineer/Manager, Platform Engineer, Build and Release Engineer, Automation Engineer, Full Stack Developer, Deployment Engineer

Programme Support and Additional Services

Our programmes are developed to support your business needs in developing the talent, skills and knowledge needed to help your business grow and succeed. Our DevOps Engineer course also includes the following components;

24 months programme duration

supported through industry recognised qualification

Dedicated Account Manager

monthly meetings to satisfy all your questions, feedback and communication needs

Personalised coach, tutor and assessor

weekly contact for your employees off the job training (virtual, telephone, face-to-face)

Training Costs

Levy businesses can use their contributions to pay for this training. The costs will be £17,000.

If you are not a levy paying business there may not be a cost for this training. If the employee on this programme is under 19 and your business has less than 50 employees, there will be no cost for the training. If they are over 19 and/or your business has over 50 employees then you will contribute 5% towards the cost of the training which would be £850.
