Education, Training & Employment Solutions

Software Development Technician

A Software Development Technician works as an integral part of any software development team, to build simple software components and applications, ranging from web, mobile and desktop. This role is typically part of a larger software development project, to ensure successful development and installation of discrete component design. Working under supervision and with support, the Software Development Technician will be responsible for implementing code, along with testing and trialling of specific components to ensure successful integration and functionality.

Programme Benefits and Outcomes

Your Software Development Technician will be able to;

- Develop a range of technical proficiencies, including but not limited to – Python, Java and C# fundamentals, Web fundamentals – HTML, CSS and JavaScript, Systems development fundamentals, SQL and data modelling, Microservices and Cloud tools.
- Understand how the skills fit your business requirements and implement these effectively
- Develop the qualities needed to perform well under pressure and as part of a wider software development team and Digital/IT/Technology organisation.

Nationally and Industry Recognised Qualifications

Alongside the programme, your employees will gain a Professionally recognised qualification to support their development, supporting your organisation in developing a high-skilled workforce.

Continuation Courses for your Employees

TEAM LEADING AND MANAGEMENT

Once your employee has developed the skills, knowledge, behaviours and experience needed to thrive in their role, our tailored pathway courses can support your organisation to progress them into supervisory, managerial, and even leadership roles. We do this successfully through advancing the skills, knowledges and behaviours previously learned, and supporting your employee to understand how the combination of technical knowledge and leadership skills and capabilities can benefit themselves, the staff and the organisation as a whole.

Our Software Development Technicians have gone on to completing the following continuation courses;

TEAM LEADING LEVEL 3

TEAM LEADING LEVEL 5

OPERATIONS MANAGER LEVEL 5

THESE HAVE LEAD TO EMPLOYEES PROGRESSING INTO THE FOLLOWING ROLES;

Software Development Technician/Manager, Developer, Web Developer, Application Developer, App Developer, Games Developer, Software Developer, Application Support Analyst/Manager, Programmer, Programmer and Automated Test Developer.

Programme Support and Additional Services

Our programmes are developed to support your business needs in developing the talent, skills and knowledge needed to help your business grow and succeed. Our Software Development Technician course also includes the following components;

18 month programme duration

supported through industry recognised qualification

Dedicated Account Manager

monthly meetings to satisfy all your questions, feedback and communication needs

Personalised coach, tutor and assessor

weekly contact for your employees off the job training (virtual, telephone, face-to-face)

Training Costs

Levy businesses can use their contributions to pay for this training. The costs will be £15,000.

If you are not a levy paying business there may not be a cost for this training. If the employee on this programme is under 19 and your business has less than 50 employees, there will be no cost for the training. If they are over 19 and/or your business has over 50 employees then you will contribute 5% towards the cost of the training which would be £750.
